

Khushi

Computer Science Undergraduate | Full-Stack Developer

+92 330 3268480 | khushijagwani04@gmail.com | Karachi, Pakistan

GitHub: github.com/khushi-Jag | LinkedIn | Portfolio

Professional Summary

Results-driven Computer Science undergraduate with strong problem-solving ability and structured logical thinking. Experienced in full-stack web development, backend system design, and relational database management. Skilled in building efficient algorithms, implementing clean architecture, and utilizing Large Language Models (LLMs) effectively for debugging, research, and productivity enhancement. Committed to developing scalable, maintainable, and performance-optimized software solutions.

Education

BS Computer Science (CGPA: 3.4 / 4.00)	2023 – Present
SZABIST - Shaheed Zulfikar Ali Bhutto Institute of Science and Technology, Karachi, Pakistan	
Intermediate in Pre-Medical	2021 – 2023
BISE Sukkur – Board of Intermediate & Secondary Education, Pakistan	

Professional Experience

Intern – Inter-Services Public Relations (ISPR)	Jan 2026 – Feb 2026
Karachi, Pakistan	
- Collaborated with cross-functional teams on digital media initiatives and coordination tasks. - Developed strong professional communication and structured workflow practices. - Enhanced analytical thinking and organizational discipline in a professional environment.	

Technical Skills

Core Programming & Logic Building: Java, JavaScript, Python, C, Object-Oriented Programming (OOP), Data Structures, Algorithmic Thinking, Strong Logical Reasoning

Problem Solving: Structured debugging approach, modular system design, analytical thinking, performance optimization

AI & LLM Utilization: Prompt Engineering, Effective use of Large Language Models (LLMs) for code generation, debugging, documentation, and research assistance

Backend Development: Node.js, Express.js, RESTful APIs, Authentication & Authorization, CRUD Operations

Frontend Development: HTML5, CSS3, JavaScript, Responsive Web Design

Database Systems: PostgreSQL, SQL Queries, Relational Database Design, Schema Normalization

Tools & Workflow: Git, GitHub, VS Code, SDLC, Agile Basics, Clean Code Practices

Projects

Academic Records Management System Node.js, Express, PostgreSQL	2024 – 2025
- Designed and implemented a secure academic data management system with complete CRUD operations. - Built role-based access control ensuring secure and structured authorization logic. - Optimized relational database schema for performance and data integrity. - Applied modular backend architecture and logical API structuring.	
Job Portal Management System Java (OOP)	2023 – 2024
- Developed a modular terminal-based job portal using object-oriented principles. - Applied inheritance, encapsulation, abstraction, and polymorphism effectively. - Implemented authentication and structured user management logic.	
Cafe Management System HTML, CSS, JavaScript	2023 – 2024
- Built a responsive frontend interface with intuitive layout and usability. - Implemented structured UI logic for menu, ordering, and billing processes. - Focused on clean design and efficient front-end behavior.	

Certifications

- Merit Scholarship – 1st Position (Fall 2025), SZABIST
- Agile & Scrum Training – Udemy
- Google IT Support Professional Certificate
- Google Prompting Essentials – Coursera
- AI Development – HP Life
- Python Programming – Unithena
